March 7, 2010

Nick's facial expression says it all. Where's the propeller? What happened? The "smack up" only required a touch of hot glue and screwdriver..
02.17.2010

March is here!

We have six weeks until the Spring Fun-Fly.

Hey kiddies! Last month I pointed out that "Our spring 2010 event schedule is filling up rapidly." It's true! There are three events available for your enjoyment. I have three openings in the van for this coming Saturday. Come see me for a permission slip immediately if you want to go. Two seats are filled and they are going fast. I assume your parents want to know what's going on and who this manic airplane guy is if he's driving you around the state to buy R/C planes.

1. Lebanon Flea Market - to buy stuff

- March 13th, 2010
- Three seats open in the district van
- Bring money for lunch, or bring lunch.
- Leave from H-14 at 8am, return 12-1:30pm.

2. Hamburg Swap Meet - to sell stuff

- March 27th, 2010
- Two seats open in the district van
- Bring money for lunch, or bring lunch.
- Leave from NP at 6:15am... early...
- Return 3pm and on. (depends on sales)

3. Fun-Fly Practice

- March 30th, 7-10pm
- Tuesday night
- Girls gym (no cost to anyone)

March is what you make of it! I've been making a lot of model airplanes and hope you will continue to support our club efforts by making planes too. I truly want to thank each and every one of you for the fun I have on Wednesday afternoons. They are the most fun of all weekday afternoons!

We added a new Vapor and another DX5e to our collection of parts and equipment. Although the Vapor was quickly 'mishandled' it was just as quickly repaired.

I'll see you on Wednesday!

Mr. V. voichemg@npenn.org

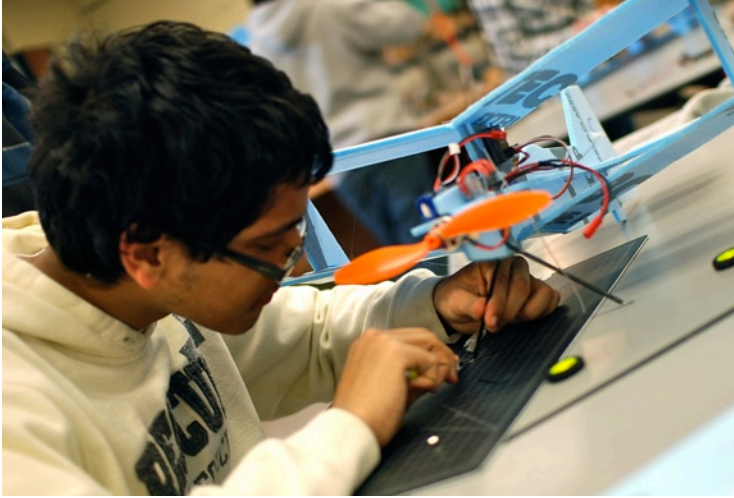

February pictures

What we've done, and where we're headed...

Clockwise from top right:

The gang gathers around the work table to admire some projects. Nick and Brian finish their biplanes. Trevor launches the depron micro glider. Mr.V's new plane will make it's way into the club fleet. Sunit works on attaching the landing gear.

Ryan (left) opens the new Vapor with extreme intensity. **Mark** (right) launches his new flying wing in the gym.
